

**FOR IMMEDIATE RELEASE:**

### **Dur-A-Lift Inc. Introduces New Model DVS-29 Aerial Lift for Cargo Van Applications**

George, IA August 23, 2004 Dur-A-Lift, Inc. of George, Iowa introduces a new aerial lift for cargo van applications, the model DVS-29. The Dur-A-Lift DVS-29 aerial lift is designed to meet the increasing demands customers place on van mounted aerial lifts while providing a low cost package versus the customary cab, chassis and utility body configuration.

- The van configuration adds an extra measure of security for inventory and tools.
- Larger operators and increased tool carrying capacity is no problem with a basket that is rated at 350 pounds in either the end hung or side hung position.
- The extension boom is manufactured with a drop down leg, which lowers the basket in the stowed position, allowing the operator to step directly into the basket without climbing unsafe ladders.
- Rotation is accomplished with a rugged shear ball rotation bearing, driven by a totally enclosed worm gear and motor assembly.
- With low maintenance in mind; all pivoting joints are equipped with Teflon coated/fiberglass reinforced bearings. This style of bearing keeps the DVS-29 in the field, by reducing the amount of time and manpower required for maintenance and greasing.
- The aerial lift base is located inside the van body for ease of access to hydraulics and electronics. A seven-inch structural tube connects the base to the outer lift portion, this connection requires only a single seven-inch hole in the van roof that is rubber flanged and clamped for a tight seal against weather.

Durability, performance, efficient maintenance features and attractive pricing make the new DVS-29 Aerial Lift from Dur-A-Lift a practical and functional tool for everyone from small contractors to large multi-state telecommunications companies. For additional information, or photos pertaining to the DVS-29 contact: Loren Top by phone at 1-877-4-DURALIFT or by fax at 1-712-475-2809. Write to Dur-A-Lift Inc. at 2002 Kingbird Avenue, P.O. Box 8, George, IA 51237 or e-mail us at [sales@dur-a-lift.com](mailto:sales@dur-a-lift.com).
